

# Green Practices

- 
- We recycle all of our damaged linens by redesigning them into overlays, runners, sashes, and napkins.
  - We re-utilize our laundry bags on as many orders as possible, on both our truck deliveries, and our shipped deliveries.
  - We recycle and reuse our delivery and shipping boxes and linen hangers.
  - We donate discontinued linens to charitable organizations and offer a once-a-year linen "Super Saturday Sale" so local customers can receive deep "garage sale" discounts on beautiful items.
  - We attempt to conserve water and energy each and every day by utilizing top of the line energy efficient washers and dryers.
  - We do not use perchloroethylene (PERC) in our laundry facility.
  - To reduce our Carbon footprint, our Account Representative car is a Hybrid Toyota Prius.
  - We are continuously updating and monitoring our products and machinery to achieve environmentally sustainable best practices.
